**DETAILED ACTION**

1. The indicated allowability of claims 9-15 is withdrawn in view of the newly discovered reference(s) to Berhan. Rejections based on the newly cited reference(s) follow. And, the indicated allowability of claims 20-22 is withdrawn.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-8 and 16-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification provides support of an obtaining device which obtains reproduction control information, however, the specification does not provide support of an obtaining device or other like device/circuit which obtains or receives 'only' reproduction control information or control information. Further the specification provides support of correspondence information, however, the specification does not provide support of a corresponding information generating device

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 9, the claim language recites “ audio information reproducing apparatus” and “a reproducing device which reproduces the audio information”. In respect the claim language and the claim interpretation, the difference between the audio information reproducing apparatus and the reproducing device is unclear to the examiner.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 9-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Berhan, U.S.

Pub. No. 20050013448.

Regarding claims 9-11, and 13-14, Berhan discloses a system for audio data collection and management. Berhan's disclose comprises audio data which may be implemented or used as an audio stereo system of an automobile, a personal computer system, a home stereo system and/or a combination thereof, which indicates an audio information reproducing apparatus, including a storage media device or database which indicates a storage device, the audio music and information data may be removed from a CD and transmitted to a control unit that includes a

CD Reader and storage media (which various form so memory (claim 14), which is transferred via serial links (claim 13) and interface coupled between the various components, indicates the transmitting device, an obtaining device, and transferring device; a control panel is provided that enables user input or system generated control information for the reproduction of the audio information, which indicates the controlling device , and provides inherent support of the generating apparatus as evident of the control information processing and the controlling means of the automobile audio system and/or the computer system, and a reproducing device may be the sound system which utilizes the audio information (figures 2A-6, 8, 10-13, and paragraphs 0011-0013, 0035-0036, 0038-0040, 0043-0044, 0047, 0050, 0057-0059, 0066-0070).

Regarding claim 12, Berhan discloses everything claimed as applied above (see claim 9). Berhan further discloses a display for the personal computer and the audio stereo system of the vehicle (figures 2A and 2B).

Regarding claim 15, Berhan discloses everything claimed as applied above (see claim 9). Berhan further disclose that invention may be used in an automobile system, and that system may be used with a computer and computer related technologies, such as downloading the audio from the Internet (paragraph 0072), which indicates the claimed limitations.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

The applicant essentially argues of that prior art of record, Brooks, fails to disclose the claimed limitation of the transmitting device, therein as claimed for anticipation of the claimed

invention, and fails to establish a prima facie case of obviousness, therein of the dependent claims. The a new reference of prior art has been used to provide an art rejection that corresponds the claimed invention in respect the a memory storing device, a transmitting device, obtaining device, transferring device, generating device, reproducing device and an audio reproduction information reproducing device.
